

BUSINESS ANALYTICS (BAPG)

Ontario College Graduate Certificate | 3 semesters | Barrydowne

You will gain the skills to extract meaningful insights from very large and complex data sets to support business decision-making. You will learn how to collect, curate, manipulate, encode, and store data sets so they can be analyzed and mined in such a way that they can be reused and repurposed to solve challenges and predict trends in any size and type of business. Key areas of study include database design and management, business analytics, market research, data mining, and decision-making through analytics.

Admission Requirements

Graduate of a recognized two- or three-year postsecondary program

Required Courses

- Introduction to Excel course (or equivalent)
- At least one postsecondary math course (or equivalent)

Students who do not possess the foundational math and Excel skills will need to take the bridging course/s prior to registration.
