

# MOTIVE POWER TECHNICIAN - TRUCK AND COACH (TCTN)

## Ontario College Diploma | 4 semesters | Barrydowne

After learning the basic fundamentals of diesel engines, power trains, electrical systems, hydraulic systems, and brake systems for heavy equipment in first year, you'll undertake training in second year that will enable you to meet the challenges of the truck and coach trade. In-class work is complemented by extensive shop training where you will be expected to develop a high standard of craftsmanship, problem-solving skills, and personal pride in the trade.

### Program Highlights

- 2 years – 4 semesters
- Co-op Diploma Apprenticeship option
- Work on scoop trams, trucks, coach buses, and other types of equipment in our heavy equipment shop

### Co-op Diploma Apprenticeship Program Option

The Co-op Diploma Apprenticeship program combines a college diploma and apprenticeship training. The placement for this program is an optional co-op and is not required for you to graduate. You can choose to complete your postsecondary program and graduate with a certificate or diploma without participating in the co-op option. However, if you choose, and qualify, to participate in this optional Co-op Diploma Apprenticeship program, you may become a registered apprentice sponsored by your co-op employer. Through your participation in this program, you will have the opportunity to participate in paid co-op placements while earning a college certificate or diploma. Your academic curriculum, which enables you to receive Level 1, Level 2, or Level 3 Trade School completion from the Ministry of Advanced Education and Skills Development after each successful year of schooling, will be enhanced by the experiences from your co-op placements.
